STIC-Biotech/ChemLib

Subject:

SEARCH request for Serial No. 09/674377

STIC,

Please search SEQ ID NO: 1 and 2

- -pending
- -issued
- -commercial

Also, please align the two sequences with each other.

Thanks.

# STIC SEARCH RESULTS FEEDBACK FORM

#### Biotech-Chem Library

Questions about the scope or the results of the search? Contact the searcher or contact:

Mary Hale, Information Branch Supervisor Remsen Bldg. 01 D86 571-272-2507

/oluntary Results Feedback Form
> I am an examiner in Workgroup: Example: 1610
Relevant prior art found, search results used as follows:
102 rejection
103 rejection
Cited as being of interest.
Helped examiner better understand the invention.
Helped examiner better understand the state of the art in their technology.
Types of relevant prior art found:
☐ Foreign Patent(s)
Non-Patent Literature (journal articles, conference proceedings, new product announcements etc.)
> Relevant prior art not found:
Results verified the lack of relevant prior art (helped determine patentability).
Results were not useful in determining patentability or understanding the invention.

Ca

```
A;Description: dissolves the fibrin of blood clots; acts as a proteolytic ns the walls of the graafian follicle; also activates the urokinase-type p A;Pathway: fibrinolysis C;Superfamily: plasmin: Princip Learning
                                                                                                         C;Comment: Plasminogen is synthesized by the kidney and is present in plasma and many C;Comment: Plasminogen is converted into plasmin by plasminogen activators, both plasm mediately after dissociation from the clot. In the presence of the inhibitor, the activation involves also removal of the activation peptide. C;Comment: Stromelysin 1 (see PIR:KCMSS1) acts on plasminogen to produce angiostatin. eful in treating solid tumors.
                                                                                                                                                                                                                                      Eur. J. Biochem. 224, 863.871, 1994
